

FLAT FLEX FLOW

METAL DETECTOR METRON 05 FlatLine

FLAT METAL DETECTOR FOR INSTALLATION BETWEEN
MULTI HEAD WEIGHER AND VERTICAL BAG FILLING MACHINE

- detect **all kinds of metals** as inclusions or bulk parts
- minimum installation height for large integration facility
- best recognition signal by optimum operating safety
- compact and versatile by industrial appropriate system concept

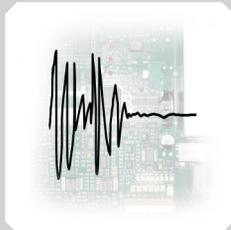

MESUTRONIC

Metal Detection made in Germany

METRON 05 FlatLine

Metal Detection made in Germany means:

- demand- oriented solution efficient and flexible e.g. with integrated hopper made in stainless steel or with changeable hopper made of food grade plastic material
- easy and time-saving use by modernest, self-explanatory, clearly and efficient Menu Guide with Touch Display.
- maximum possible reliability and availability by optimized engineering efforts
- e.g. changeable memory card (SD) for safety guaranty of product and operational data by power failure
- central data management, up to 125 terminal devices and remote maintenance modules possible by network answers

best performance even by strong product effect, thanks efficiently compensation procedure by Signal Processor with large Dynamic Range and precise working fade out system. (Dynamic Product Control)

Detailed information available in our technical Data Sheet

Version 1

Version 2

Version 1 - with integrated hopper made in stainless steel
Version 2 - with changeable hopper made of food grade plastic material

Whatever concept you prefer, you will get enthusiastic about

This system with changeable hopper offers an optimal protection for metal impurities by frequently changing of bag sizes.
